Accept cookies

Add cookie banner to QRFS site so that the user either accepts or rejects cookies, and is only asked one time to do this.

Script should actually reject (and delete all cookies) if that option is checked.

Code already exists, but modal is not working in BigCommerce when (please click here) is clicked, and also need to ensure it actually rejects cookies.

Add additional note with
link to modal explaining
potential increase in
international shipping

Secured by **PayPal**

If the user enters an international address (meaning outside United States) need to add an additional line below to the 'Shipping' checkout item that includes a checkbox and states:

"I understand there may be additional customs & duties fees [due upon delivery.](#)"

If the user clicks 'due upon delivery' a modal will open with additional information that will be provided (text content).

User MUST check the box in order For the 'Place Order' button to become active.
